## DAREDEVIL KITTEN

Hi! My name is Natasha!

The first thing my foster parents would probably tell you about me is that I \*love\* to explore. I go everywhere in their apartment, and they don't seem to mind. I like to get up into the windows and look out on the street - there's always lots going on down there and the people seem like they would be so much fun to chase!

When I'm not napping (which is about half the time), you can find me in the bathtub right after your shower trying to get the last drops of water, or chasing anything that might be a toy. I should tell you that I have a fondness for rolls of toilet paper - my foster mum has taken to keeping a close eye on me when I head to the bathroom for no good reason. I can't help it - it's so fun to build piles of tissue on the floor! Most of the time I'm pretty good though - just my sweet cuddly self, not getting into any trouble.

My favourite toys right now are anything that crinkles, feathers, paper, and little fake fuzzy mice. I also get pretty excited about the laser pointer. Now \*that\* is a toy I could chase for hours. When I'm not playing with toys, you'll probably find me paw-in-paw with my partner in crime and brother Boris, who loves me just as much as I love him. I get so sad when I can't find him.

I have lots of love to give and have no problem trying to spread it around. I especially love to cuddle and will curl up in your lap, on your shoulder, or on your foot to take a nap. I love to come and rub up against your face and say hello first thing in the morning, or when I know you're having a bad day. When I'm happy I purr and purr and purr.

My perfect new home would have at least another kitty for me to play with so I don't get bored, though I might be ok on my own, too. I'd love to have a friend that is fun, friendly, and active and likes adventures - and some new owners who have some time to play with me every day.

Oh - one last thing. My foster parents are pretty nice and took really good care of me - they are really going to miss having me around. If you want to tell them how I'm doing, I know it would make them happy! You can email them at [robyn@lilybug.ca](mailto:robyn@lilybug.ca).

## Vital Statistics

Name:  
Natasha, tash, tasha.

Age: three months

Type of Cat: Domestic Long-Haired  
Tabby

I Eat:  
Mostly I eat lam's kitten crunchy food, but I'm also fond of the wet stuff twice a day. I also like cheese and english muffins.

I drink: Lots of water. As a treat, I am especially fond of San Pellegrino. I like the bubbles!

Litter: I use Feline Fresh litter because it's flushable and isn't chalky and dusty. (it smells like pine trees!) But I will settle for regular clay litter if I have to - as long as there's somewhere for me to go.

Pets: I've never played with dogs but my brother Boris and I have hung out with each other our \*entire lives\*. If I can't live with Boris, I'll be sad for a bit, but I'm sure my new home will be great anyway! I do think that it would be nice to have someone to go exploring and take naps with though!
